Office of Technical Assistance
251 Causeway Street, Suite 900
Boston, MA 02114 (617)626-1060
www.mass.gov/ota

*The Office of Technical Assistance (OTA), a **non-regulatory** branch of the Massachusetts Executive Office of Environmental Affairs, assists Massachusetts facilities with reducing their use of toxic chemicals and/or the generation of toxic manufacturing by-products. OTA's services include technology development and product research, leveraging federal and state funding to promote new equipment purchases and environmental management systems support - all at **no charge**. Through a one-on-one, hands-on approach, OTA is able to provide clear, specific guidance that businesses can readily put into action. For further information, visit the OTA web site at **www.state.ma.us/ota***
